Just look at what our salesman, Pat Kelly, in Omaha, NE, did to his bathroom wall! Using a Permatone Venetian Plaster, he was able to create a stylish backdrop.

PermaTone offers a vast array of textured finishes. Everything from Old Mottled to the most modern Venetian plasters.

Here's an ideal product to make any interior wall truly unique.

Here is the First Federal Bank job done by Scherr Plastering. They used a specialty finish called Craquelatto, also offered by PermaTone. It is reminiscent of antique weathered plaster. Definitely recommended for interior commercial and residential applications as an elegant accent. Please come in to any of our offices and see the entire line of PermaTone interior products.

INSIDE THE JOB...

FIRST BANK & TRUST SAVED TIME AND MONEY BY USING CORONADO MANUFACTURED STONE IN PLACE OF NATURAL PINK QUARTZITE. THIS IS A GREAT WAY TO HAVE THE LOOK OF REAL QUARTZITE AT ABOUT A FRACTION OF THE PRICE.

This job really showcases how using multiple products like **Coronado Stone**, **ArcusStone** and **Dryvit** combined, can bring a project from concept to reality.

PICTURED TO THE LEFT IS AN EXAMPLE OF A **POST CAP** THAT **ArcusStone** WAS ABLE TO MATCH IN ORDER TO RESEMBLE THE QUARTZITE STONE THAT IS INDIGENOUS TO THE AREA.

WHAT IS DRYVIT'S GENESIS DMS?

Genesis DMSpray is a newer product carried by Dakota Wall Systems that can really save time. This adhesive & basecoat is extremely easy to use. Although it's created for spray application, it can also be used for non-spray applications, for example, adhering foam to the substrate and doing detail work. **Genesis DMSpray** is great to use in hot weather because it's formulated to have a longer pot life, less false set, extended open time and stronger wet grip. Whether you're spraying or trowling, come in to your local **Dakota Wall Systems** office and give **Genesis DMSpray** a try!

Here's a sprayer used for DMS!
